

Newsletter 30 (September 2012)

There have been two changes to the personnel in the CDS team. First Ian Carter is leaving the team because he has taken on an enormous workload as manager of the Microbiology Laboratories at SEALS North. We would like to thank Ian for all his help, particularly as webmaster of the CDS website.

Also we are delighted that Dr. Peter Newton has consented to join the team as the consultant medical microbiologist. Peter is a medical microbiologist in SEALS South practising out of the Wollongong laboratories. He has been an enthusiastic supporter and user of the CDS for many years. He has made several useful suggestions over this period and these have resulted in the incorporation of a number of valuable modifications to the method.
